

Ashwin Deshpande

Data Scientist

Data Scientist with 4+ years of experience. Looking for a challenge and a chance to grow into a technical leadership role.

PROFESSIONAL EXPERIENCE

Thynk Capital LLC — San Jose, CA - Data Scientist - May 2023 – Feb 2025 [\[Slides\]](#)

- Led the end-to-end development and maintenance of a consistent & high performance **cloud-native AI-hedge-fund** system that grew a half a million seed budget by 28%.
- Translated **business requirements** into multiple levels of **product definitions** with executive, quantitative and data engineering teams.
- Conducted **ML system design, exploratory data analysis, feature engineering, simulation, monitoring & ops** using **time-series financial data** across asset classes.
- Developed and deployed **predictive models** to rank trading signals, monitor and minimize risk using **A/B testing**, Bayesian hyperparameter testing for continuous **model evaluation** (AUC/Precision Recall)
- Built scalable **cloud infrastructure** and **CI/CD pipelines** for real-time model updates using **AWS, GCP, Airflow, Vertex-AI pipelines, MLflow, PySpark, and Transformers**.

Bombora — Chicago, IL - Data Scientist - Jun 2022 – Dec 2022 [\[Slides\]](#)

- Developed an automated ML pipeline in **VertexAI (GCP)** to process millions of company profiles weekly, improving sales targeting.
- Decreased false positives by 8% in a Random Forest lead-scoring model via hyperparameter tuning and advanced feature engineering.
- Created reusable **SHAP** and **univariate analysis** tools to interpret models and present data acquisition strategy for **business stakeholders**.

UIC NLP Lab — Chicago, IL - Graduate Research Assistant - Jan 2021 – May 2022

- Built speech-to-text ML pipelines and fine-tuned **BERT-based NLP models** for dementia detection using spontaneous speech.
- Published findings in **ACL BioNLP 2022** demonstrating statistical significance of disfluency patterns in diagnosis: <https://aclanthology.org/2022.bionlp-1.4/>
- Developed reproducible research codebases and dashboards for healthcare stakeholders.

Primenumbers Technologies — Bangalore, KA - Data Science Engineer - May 2019 – May 2020

- Engineered **ETL pipelines** to ingest, clean, and normalize raw government contract data using **PostgreSQL** and **Python**.
Built **NER model (F1-score: 91%)** to extract companies from tenders, enhancing search engine **precision** by 5% via A/B testing.
- Supported backend developers by integrating predictive APIs into production environments.

PROJECTS

E-commerce rank optimization of financial products for increasing EPV [\[Code\]](#)[\[Slides\]](#)

[Earnings per visitor](#) | [Position bias](#) | [Inverse Propensity Weighting](#) | [Google Analytics](#) | [Click-through-rate](#)

Survival Analysis: Time-to-event analysis using hierarchical mixture models [\[Blog\]](#)

[R](#) | [Bayesian Inference](#) | [Survival Model](#) | [Non-parametric Hazard Model](#) | [Kaplan Meier](#)

EDUCATION

University of Illinois, Chicago — M.S. in Computer Science - 4.0

Aug 2020 - May 2022

Data Science, Machine Learning, Information Retrieval, Statistics, NLP, Text Mining

B.V.B College of Engineering & Technology, Hubli — B.Eng in Computer Science

Aug 2014 - May 2018

Data Structures, Algorithms, Web Dev, Computer Vision, Big Data, IOT

CONTACT

Technical blog:

https://ashwindeshpande96.github.io/personal_webpage/

SKILLS

Languages & Tools: Python, SQL, Spark (PySpark), Airflow, Git, Shell scripting

ML & Data Science:

Econometrics, Survival Analysis, Scikit-learn, XGBoost, Transformers, SHAP, Pandas, NumPy, PyTorch

Cloud & MLOps: AWS, GCP, VertexAI, MLflow, Docker, Kubernetes (basic)

Visualization: Matplotlib, Seaborn, Plotly, Dash

Modeling Expertise: Time Series, Classification, Regression, Feature Engineering, A/B Testing, Clustering, PCA

Soft Skills: Stakeholder communication, Agile collaboration, Technical writing, Cross-functional alignment
